

UC RIVERSIDE - Student Comments of Instructor, Laboratory Courses - Spring 2021

Course: CS 152 Section: 021 - COMPILER DESIGN
Instructor: Mahbod Afarin

Question # 20: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- From the horror stories I heard from the previous quarter, I was expecting to be absolutely left to the mercy of the internet to get work done for labs. Pleasantly surprised the TA wanting everyone to succeed and wanted to do his best as a first time thing. Only thing that irked me was phase 3 demonstration. If there were some better resources to switch from C to C++ instead of having to blindly code stuff and hope something works from the set of technologies that we have absolutely no knowledge in would be a nice addition to that part of the lab.
- The class really helped with the assignments.
- The TA, Mahbod Afarin, provided immense help during lab sessions. Mahbod was more than helpful and I really appreciate that his office hours are flexible and replies emails on the same day. Overall, Mahbod was a helpful TA.
